BIOELECTROCHEMISTRY AND BIOENERGETICS

Vol. 35 Nos. 1 and 2 November 1994

Proceedings of the Second Congress of the European Bioelectromagnetics Association, Bled, Slovenia, December 9–11, 1993

CONTENTS

Chapter 1: Benefits and risks from electric and magnetic fields

A perspective on electromagnetic field bioeffects and risk assessment
C.E. Easterly (Oak Ridge, TN, USA) 1

Experimental study of the effect of electromagnetic fields in the early stage of wound healing
I. Detlavs, L. Dombrovska, I. Klavinsh, A. Turauska, B. Shkirmante and L. Slutskii (Riga, Latvia) 13

Comparative metabolic interference by low-amplitude swept-frequency magnetic fields vs. baseline respiratory activity and time
D.N. Russell (Tampa, FL, USA) 19

Electrochemotherapy: variable anti-tumor effect on different tumor models
G. Serša, M. Čemažar, D. Miklavčič (Ljubljana, Slovenia) and L.M. Mir (Villejuif, France) 23

The influence of extremely low-frequency variable magnetic fields on rheologic and dielectric properties of blood and the water–electrolyte balance in experimental animals
G. Cieślar, A. Sieroń (Bytom, Poland), B. Turczyński (Zabrze, Poland), M. Adamek (Bytom, Poland) and F. Jaskólski (Zabrze, Poland). 29

Chapter 2: Fundamental mechanisms and theoretical considerations on interactions between electromagnetic fields and biological systems

Interaction mechanism between electromagnetic fields and ion adsorption: endogenous forces and collision frequency
A. Chiabrera, B. Bianco, E. Moggia and T. Tommasi (Genoa, Italy) 33

Modelling of the effect of a weak electric field on a nonlinear transmembrane ion transfer system
G.Yu. Riznichenko, T.Yu. Plusnina and S.I. Aksyonov (Moscow, Russian Federation) 39

Effect of static magnetic field on lectin binding to erythrocyte membrane
L.L. Traikov, M.A. Kuzmanova, S.P. Ivanov (Sofia, Bulgaria) and M.S. Markov (New York, USA) 49

Effects of extremely high frequency electromagnetic fields on electrophoretic mobility and ATP content in rat erythrocytes
M. Kuzmanova, S. Ivanov, V. Nankova (Sofia, Bulgaria) and M. Markov (New York, USA) 53

Static magnetic field modulation of myosin phosphorylation: calcium dependence in two enzyme preparations
M.S. Markov and A.A. Pilla (New York, NY, USA) 57

Gap junction impedance, tissue dielectrics and thermal noise limits for electromagnetic field bioeffects
A.A. Pilla, P.R. Nasser and J.J. Kaufman (New York, NY, USA) 63

Weak magnetic field modulation of ion dynamics in a potential well: mechanistic and thermal noise considerations
D.J. Muehsam and A.A. Pilla (New York, NY, USA) 71

Evaluation of fractal properties of ACh-receptor channel's gating exposed to microwave fields
M. Abbate (Palermo, Italy), G. D'Inzeo, A. Palombo and L. Tarricone (Rome, Italy) 81

The role of insulin-like growth factor II in magnetic field regulation of bone formation
J.T. Ryaby (Phoenix, AZ, USA), R.J. Fitzsimmons (Loma Linda, CA, USA), N.A. Khin (Phoenix, AZ, USA), P.L. Culley (Tempe, AZ, USA), F.P. Magee, A.M. Weinstein (Phoenix, AZ, USA) and D.J. Baylink (Loma Linda, CA, USA) 87

Tumour treatment by direct electric current: electrode material deposition
D. Miklavčič, A. Fajgelj and G. Serša (Ljubljana, Slovenia) 93

Low level direct current — cell culture fibroblast model
U. Batista, D. Miklavčič and G. Serša (Ljubljana, Slovenia) 99

Chapter 3: EM field distribution and generation systems

Numerical approach based on the moment method for prediction of electromagnetic energy deposition in living tissues
S. Caorsi, A. Ferrando, G.L. Gragnani and M. Pastorino (Genoa, Italy) 103

Electromagnetic inverse-scattering solutions for inhomogeneous cross-sections of cylindrical biological bodies by a modified Born approximation and a stochastic Markov random fields approach
S. Caorsi, G.L. Gragnani and M. Pastorino (Genoa, Italy) 109

Numerical calculation and comparison of electromagnetic field parameters inside biological tissue
V. Valenčič, A. Krašna, B. Jurčič-Zlobec and A. Berkopec (Ljubljana, Slovenia) 115

Triaxial exposure system providing static and low-frequency magnetic fields for in vivo and in vitro biological studies
L. Raganella, M. Guelfi and G. D'Inzeo (Rome, Italy) 121

Generation of extremely-low frequency magnetic fields with standard available commercial equipment: implications for experimental bioelectromagnetics work
R. De Seze (Nîmes, France), A. Lahitte, J.M. Moreau (Talence, France) and B. Veyret (Bordeaux, France) 127
